GemBox Support Center

Further Chart Support Completed

- Dane Kasper
- **Forum name:** #GemBox.Spreadsheet Feature Request

a) Support for editing chart components styles (font, font size, color etc.)

b) Save single chart with chart component styles intact

Comments (9)

Also, please add support for coloring the different plot points inside of charts. In excel this is accessible from right-click on bar and selecting fill options to change colors.

Thomas Brown

I'd also like to see background images in a chart preserved when saving XLSX to PDF

Dean Kopesky

We would particularly like support for setting chart series line color and weight.

Ashish

7 years ago

We would like to have functionality to change the legend colors. Also, I have values from 0-10 on X axis and 0-20 on Y axis. So here 0 appears twice, one on X and other on y-axis. Can we have a functionality where 0 appears only once i.e. one 0 for both x and y axis.

Please add support for adding data labels and as many formatting options as possible to replicate existing Excel functionality

Alex Kreis

7 years ago

Need to be able to set color of chart lines or bar graphs please.

David Aggeler

7 years ago

DataBars as formatting rules would help me a lot. It helps to avoid many sheets with different graphs. DataBars in Pivot Tables is then the ultimate analyzing tool.

Kieran
