# GemBox Support Center

TextBox content: VerticalAlignment Completed

- Daniel
- **Forum name:** #GemBox.Document Feature Request

For text inside a TextBox: It would be nice to have the possibility to set the vertical alignment to 'center' or 'bottom' if required (in addition to the default 'VerticalAlignment.Top').
For example as a property of the 'TextBoxFormat' Class, it seems there is already a private field that reflects the vertical alignment (0,1,2) when reading a document.

Hi, We have now exposed this as a public API. You're now able to use
TextBox.TextBoxFormat.VerticalAlignment property to set the desired vertical alignment.
Note that this is available in the latest publicly released bugfix version. Regards, Mario
